

# **Canadian Society of Allergy and Clinical Immunology**

## **CSACI Vision:**

The best allergy, asthma and immunology care for all.

## **CSACI Mission:**

To lead quality care in allergy, asthma, and immunology through education, research, advocacy and organizational excellence.

## **Goals for 2023 and beyond**

1. Contribution to CSACI position statements/publications with pediatric relevance
2. Planning assistance in 2023 CSACI ASM and NAPAAC 2024 meeting
3. Respond to Health Canada inquiries pertaining to pediatric allergy as required
4. Allergist - Patient handouts resource development for use in private practice
5. Online media directory to further explain WHY see a pediatric allergist, who can be tested, why test, is it time to consider immunotherapy
6. Encourage active partnership with CPS re position statements pertaining early introduction, atopic dermatitis, immunotherapy etc.

## **Explanation of Goals**

- 1-3 Be available to contribute to requests, give pediatrics a voice at the table!
4. Develop patient directed resources (1-2 page handout) for the community allergy practice. These reviewed q2 years which can be downloaded and adapted to an allergists' practice. (A perk to CSACI membership!) Partnerships can be made with other sections eg rhinitis etc. can be co-developed.
5. CSACI media development specifically re why see an allergist (PEDIATRIC) - and what we can offer. Can be used from other prior webinars, or podcasts/youtube development etc. - made available to the general public.
6. Formal avenue for partnership with CPS to discuss new position statement development and ongoing relationship between CSACI current section advisor as a peer reviewer/developer and CPS

## **Teleconferences, Video Conferences, and Progress to date**

- TBD – CSACI Pediatrics Teleconferences topics as they arise
- Refer to Goal #5

Respectfully submitted,  
Mariam Hanna
